KEN CARLO D. JAVIER

E: kcdjavier@gmail.com | T: +63 955 387 7030 | W: kenjavier.dev

EXECUTIVE SUMMARY

A **software engineer** with over 5 years of experience in the education technology, health technology, and startup software industries. An adaptable engineer who specializes in full-stack JavaScript development, payment and third-party system integration, and data-oriented backend work. A Magna Cum Laude Computer Science graduate of Pamantasan ng Lungsod ng Maynila and a certified OpenJS Node.js Application Developer interested in full-stack, backend, and platform engineering roles.

PROFESSIONAL SKILLS AND INTERESTS

- **Full-Stack Web Development**
- **System Migration and API Integration**
- **Data Architecture and Reporting**
- **Production Support and Reliability**
- **Accessibility and UI Engineering**
- **Collaboration and Code Quality**

EDUCATION

Bachelor of Science in Computer Science. Pamantasan ng Lungsod ng Maynila (Manila, Philippines)

- Graduated *Magna Cum Laude*
- Thesis: Enhanced Profile Hidden Markov Model for Metamorphic Malware Detection

PROFESSIONAL SKILLS DEMONSTRATED

CAMBRIDGE UNIVERSITY PRESS & ASSESSMENT (MAKATI CITY, PHILIPPINES) *November 2023 — Present*

A department of the University of Cambridge providing academic publishing, English language learning, and assessment services to learners and institutions worldwide.

Software Engineer *(Promoted from Junior Software Engineer, April 2025)*

Builds and maintains full-stack features for a global learning platform serving thousands of learners, leads integration workstreams for payments and data, and supports production systems end to end.

- **System Migration and API Integration:** Led the implementation of key features for the migration of the platform's payment and e-commerce system to a new provider, ensuring seamless transaction processing and minimal downtime, and integrated third-party APIs to support business workflows and system interoperability.
- **Production Support and Reliability:** Played a key role in delivering an emergency payment solution following a cyber incident, allowing the platform to continue processing transactions and sustain revenue flow; diagnosed and resolved production issues to improve stability and reduce downtime.
- **Data Architecture and Reporting:** Designed and implemented data warehouse solutions that centralized large-scale data from multiple source systems, enabling efficient reporting, analytics, and third-party data processing.
- **Full-Stack Web Development:** Delivered learner-facing and internal features using Vue, Nuxt, Node.js, and Express, extending the admin portal with capabilities such as admin-based enrolments and refactoring legacy code to improve maintainability and system stability.
- **Accessibility and UI Engineering:** Improved application accessibility by implementing WCAG-compliant UI components and resolving usability issues affecting a diverse global user base.
- **Collaboration and Code Quality:** Contributed to code reviews and maintained clean, reusable code across cross-functional teams, and partnered with the AI team to evaluate and apply AI-assisted development tools (Claude, Cursor, GitHub Copilot) to improve developer productivity.

GoVA (REMOTE) *August 2022 — June 2023*

A remote staffing firm that places Philippine-based specialists with international client teams across engineering, design, and operations.

Frontend Developer *(Virtual Assistant)*
Built client-facing web interfaces and supported API integration across client engagements.
- **Full-Stack Web Development:** Built responsive, reusable UI components using React, Next.js, and Mantine UI, and supported backend integration and API consumption.
- **Accessibility and UI Engineering:** Translated UI/UX designs into functional, scalable frontend features and optimized web performance, improving page load speed and overall user experience.
- **Collaboration and Code Quality:** Worked directly with stakeholders to scope, prioritize, and implement feature enhancements.

DASHLABS.AI (MAKATI CITY, PHILIPPINES) *July 2022 — August 2022*
A Philippine health technology company building digital laboratory, diagnostics, and patient management software for hospitals, clinics, and testing providers.

Software Engineer Intern
- **Full-Stack Web Development:** Developed patient management features including forms, portals, and operational tools, building and maintaining both frontend and backend components for healthcare workflows.
- **Collaboration and Code Quality:** Worked alongside engineers in an agile environment to deliver production-ready features within a two-month engagement.

FIELDWORK STUDIO (MANILA, PHILIPPINES) *November 2021 — March 2022*
A Manila-based digital studio delivering web design and development projects for local clients.

Web Developer *(Freelance)*
- **Full-Stack Web Development:** Independently revamped a progressive web application for a Philippine tourism platform, implementing updated UI/UX designs, extending functionality, and managing CMS data across a five-month engagement.

STUDENT LIFE & VOLUNTEERISM

Google Developer Student Clubs (GDSC) PLM – Chief Technology Officer: Served as the technical lead of the university chapter, supporting developer workshops and student-led technical projects for the campus developer community.
PLM Computer Science Society – Public Relations Officer & Head of Creatives Committee: Handled external communications and led the creatives committee for the society's events, campaigns, and published materials.

RELEVANT PROJECTS

Enhanced Profile Hidden Markov Model for Metamorphic Malware Detection (Thesis): Improved malware detection performance through optimized feature selection and sequence modeling, implemented in Python with NumPy, Pandas, and Scikit-learn.
Sellify: Served as lead developer on a team of six in a startup incubator, building a full-stack web application that automates order collection from Facebook live selling. Integrated the Facebook/Meta API to capture and process real-time customer orders and developed backend services in Node.js and MongoDB to manage customer data and transactions.

OTHER RELEVANT INFORMATION

Certifications: OpenJS Node.js Application Developer (JSNAD) — Linux Foundation & OpenJS Foundation. A performance-based certification covering asynchronous programming, event-driven architecture, streams, module systems, and production-ready server-side JavaScript. Certificate ID: LF-hjf9t9cvqf
Technical Skills: React, Vue, Nuxt, Next.js, TailwindCSS, CSS (frontend); Node.js, Express, REST APIs, GraphQL (backend); MongoDB, PostgreSQL, MySQL (databases); Git, Docker, Kubernetes, AWS, (tools & DevOps)
