SUMMARY

Full-stack developer and GoHighLevel automation specialist focused on CRM systems, workflow design, web development, and custom integrations for growing teams. I build automation, internal tools, and websites that solve real business problems.

I'm an IT and web development professional with experience in software development, technical support, system administration, and automation. Over the years, I've worked on websites, CRM workflows, integrations, and custom tools designed to solve operational problems and improve business processes. My skill set includes PHP, JavaScript, WordPress, GoHighLevel, Zapier, API integrations, and general troubleshooting across technical systems. I'm especially interested in roles where I can combine development, automation, and support to deliver reliable and efficient solutions.

Focus areas: CRM automation · internal tools · reporting systems · APIs · custom pages

WHAT I BUILD

- **CRM Automations —** Workflow systems, lead routing, follow-up logic, and sales process automation.
- **Internal Tools —** Dashboards, error logs, reporting tools, and utility apps for business operations.
- **WordPress Solutions —** Custom pages, theme improvements, performance-minded content builds, and business sites.
- **API Integrations —** Webhooks, third-party APIs, Google Sheets pipelines, and connected system flows.
