Dear Respondent,

Greetings!

We are fourth-year Bachelor of Science in Aviation Information Technology (BSAIT) Section 2 students from the National Aviation Academy of the Philippines, conducting our capstone project entitled: **"A Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms for Shoelotskey Villamor-Pasay"** As part of our study, we respectfully invite you to evaluate the developed system. Your responses will help us assess the system's perceived usefulness, perceived ease of use, behavioral intention to use, and actual system use. Your feedback will provide valuable information for improving the system and determining its overall acceptability.

Your participation is entirely voluntary. You may choose not to answer any question or withdraw from the evaluation at any time without any penalty. All information you provide will be kept confidential and will be used solely for academic and research purposes.

Respectfully,

Charmaine Rose G. Angeles
Researcher

Kylane C. Gravino
Researcher

Melody D. Sedanto
Researcher

Noted by:

RICHARD NIEL B. PERALTA, MSIT
Capstone Adviser

ASSOC. PROF. MARY ANN ABALLIAR-VISTA, MEAM
Academic Adviser

In accordance with the Data Privacy Act of 2012 (Republic Act No. 10173), all information collected through this questionnaire will be treated with the utmost confidentiality and will be used solely for academic and research purposes. Your identity will remain anonymous, and the information you provide will not be disclosed to any unauthorized person or organization. The collected data will be securely stored and disposed of after the study's completion.

By completing this questionnaire, you indicate your voluntary consent to participate in this study.

Consent Declaration

☑ I have read and understood the Data Privacy and Confidentiality Statement.

☑ I voluntarily agree to participate in this research study.

Thank you for your valuable time and participation.

Capstone Title: "A Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms for Shoelotskey Villamor-Pasay"

Objectives of the Study

This capstone project aims to design and develop the Web-Based Service Management System with Data Analytics using Machine Learning Algorithms in order to improve operational efficiency, data accuracy, service monitoring, and managerial decision-making.

Specific Objectives

Specifically, the project aims to achieve the following:

1. Conduct a comparative analysis between the existing manual paper-based system and the developed centralized digital job order entry and management system in terms of service record accessibility, retrieval time, and accuracy.
2. Evaluate the machine learning model for predicting service turnaround duration and corresponding release dates using historical service data in terms of its predictive performance based on appropriate model evaluation metrics.
3. Determine the impact of the real-time analytics in the Sales Report page on reporting efficiency by assessing the time required to generate sales, expense, and return on investment (ROI) reports.
4. Evaluate the effectiveness of the developed system based on the ISO/IEC 25010 software quality standards, specifically in terms of:
    - 4.1 Functional suitability;
    - 4.2 Performance efficiency;
    - 4.3 Compatibility;
    - 4.4 Interaction Capability;
    - 4.5 Reliability;
    - 4.6 Security;
    - 4.7 Maintainability;
    - 4.8 Flexibility; and

4.9 Safety;

5. Measure the level of user acceptance of the developed system among the staff and management of Shoelotskey using the Technology Acceptance Model (TAM), measuring perceived usefulness, perceived ease of use, behavioral intention to use, and actual system use.
6. Recommend possible system enhancements by identifying improvements and additional features that may be implemented by future researchers to further enhance system functionality, data analytics capabilities, and user experience.

Survey Questionnaire

Part I. Respondent Profile

Instructions: Please provide the following information by filling in the data or putting a (✓) next to your response.

Name: (Optional) _____

Position at Shoelotskey: ☐ Shop Owner ☐ Shop Staff

Part II. Technology Acceptance Model (TAM) Evaluation

Instructions: Please read each statement carefully. Put a (✓) in the box that best shows how much you agree with each statement based on your experience using the Web-Based Service Management System for Shoelotskey Villamor-Pasay"

Scale	Interpretation	Description
4	**Highly Acceptable**	The system fully meets the evaluation criterion and performs exceptionally well.
3	**Acceptable**	The system meets the evaluation criterion and performs satisfactorily.
2	**Less Acceptable**	The system partially meets the evaluation criterion and requires improvement.
1	**Not Acceptable**	The system does not meet the evaluation criterion and requires significant improvement.

Criteria	4	3	2	1
Perceived Usefulness (PU)- This section evaluates whether the system helps users perform their tasks more effectively and efficiently.				
1. The system makes it easier to manage customer records and job orders.	✓			
2. The system helps track services and inventory more efficiently.	✓			
3. The system reduces the need for paperwork and manual record-keeping.	✓			
Perceived Ease of Use (PEOU)- This section evaluates whether the system is easy to learn and use.				
1. The menus, buttons, and labels are easy to understand.	✓			

Criteria	4	3	2	1
2. The system is easier to use than the manual paper-based system.	✓			
3. Adding and updating the records in the system is easy.	✓			
Behavioral Intention to Use (BI)- *This section evaluates the user's willingness and intention to continue using the system.*				
1. The user intends to continue using the system in performing work at Shoelotskey.	✓			
2. The system is better than the previous way of managing shop work.	✓			
3. The user intends to use the system regularly for managing daily tasks at Shoelotskey.	✓			
Actual System Use (ASU)- *This section evaluates how often and how consistently the user uses the system in daily work.*				
1. The user consistently uses the system for receiving shoes.	✓			
2. The user uses the system to record and manage customer job orders.	✓			
3. The user uses the system to check inventory, service status, and reports.	✓			

Part III. Analytics Dashboard Impact Evaluation

Instructions: Please read each statement carefully. Put a (✓) in the box that best shows how much you agree with each statement based on your experience using the analytics dashboard.

Criteria	4	3	2	1
Analytics Dashboard Impact *– This section evaluates how the analytics dashboard improves access to business information, supports performance monitoring, and assists in daily decision-making.*				
1. The analytics dashboard makes important business information easier to access.	✓			
2. The analytics dashboard provides useful information for monitoring sales, completed services, pending job orders, inventory levels, and service trends across different reporting periods.	✓			
3. The analytics dashboard supports informed decision-making based on sales, service, inventory, and operational performance information.	✓

PART III. Comments and Suggestions

Instructions: Please answer the questions below based on your experience using the system.

1. **What feature of the system do you like the most?**

   _____

   _____

2. **Did you experience any problems while using the system? If yes, please describe them.**

   _____

   _____

3. **What improvements or new features would you like to see in the future?**

   _____

   _____

"We assure you that your responses will be treated with the utmost confidentiality and used strictly for academic purposes."
