

The background features a light beige and cream color palette. On the left, there is a branch with several brown leaves. In the top right, there are small brown dots and a thin, elegant line. The bottom left and right corners also contain decorative elements, including a branch with leaves and abstract circular patterns with dots.

**A Web-Based Service
Management System with Data
Analytics using Machine Learning
Algorithms for Shoelotskey
Villamor – Pasay**

Objectives

1. To develop a centralized order entry that digitizes customer information, shoe condition, and requested services, replacing manual logbooks.

2. To implement a machine learning model that predicts estimated service completion dates based on historical turnaround times for specific shoe services.

Objectives

- 
3. To develop a color-coded service queue that displays shoe order progress and supports efficient monitoring of staff workload and task prioritization.
 4. To evaluate the system's effectiveness in terms of data accuracy, prediction reliability, and user satisfaction among Shoelotskey staff and management.
- 

Objectives

- 
5. To generate a business analytics dashboard that provides the owner with real-time, data-driven insights into service volume, sales, and operational trends across various reporting periods (daily, weekly, monthly, annually).
- 

Thank you!
