FOR: MR. ERICKSON A. ANTONIO, MIT
Director for Admission and Scholarship

Dear Mr. Antonio,

We hope this letter finds you well. We respectfully request your assistance in reviewing and validating the survey questionnaire for our capstone project entitled **"A Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms for Shoelotskey Villamor-Pasay."** The questionnaire has been developed to collect valuable feedback that will help improve the system's features and ensure that it effectively meets the needs of its intended users. Your evaluation will also help verify that the research instrument aligns with the quality characteristics of the ISO/IEC 25010 Software Quality Model, particularly in terms of functional suitability, performance efficiency, compatibility, interaction capability, reliability, security, maintainability, flexibility, and safety. In addition, the questionnaire includes the Technology Acceptance Model (TAM) to evaluate perceived usefulness, perceived ease of use, behavioral intention to use, and actual system use of the developed system.

Given your expertise and experience in the field, your comments and recommendations will be invaluable in ensuring the questionnaire's clarity, relevance, and effectiveness. Your insights will greatly contribute to enhancing the reliability and validity of our research instrument. We sincerely appreciate your time, support, and consideration. Thank you for helping us strengthen the quality of our study.

Respectfully yours,

CHARMAINE ROSE G. ANGELES
Full Stack Developer

KYLANE C. GRAVINO
System Analyst/Quality Assurance Lead

MELODY D. SEDANTO
Project Manager

SURVEY INSTRUMENT VALIDATION RATING SCALE

Instructions: Please indicate your degree of agreement or disagreement on the statements provided below by checking the box which corresponds to your best judgment.

Capstone Title: A WEB-BASED SERVICE MANAGEMENT SYSTEM WITH DATA ANALYTICS USING MACHINE LEARNING ALGORITHMS FOR SHOELOTSKEY VILLAMOR-PASAY

Researchers:

- 1) Charmaine Rose G. Angeles
- 2) Kylane C. Gravino
- 3) Melody D. Sedanto

Scale: 4 – Highly Acceptable

3 – Acceptable

2 – Less Acceptable

1 – Not Acceptable

	Criteria	4	3	2	1
1	The survey items are relevant to achieving the objectives of the study and the system's goal of improving service management operations for Shoelotskey Villamor-Pasay.	✓			
2	The survey items are aligned with the proposed system's core functions, including job order management, service monitoring, inventory management, data analytics, and machine learning-based service completion prediction.	✓			
3	The survey contains an appropriate number of items for evaluating the major features and functionalities of the Web-Based Service Management System.	✓			
4	The survey items are comprehensive and adequately cover the intended aspects of the developed system without being too narrow or too broad.	✓			
5	The survey covers the ISO/IEC 25010 software quality characteristics relevant to evaluating the developed system.	✓			
6	The survey includes appropriate items for measuring user acceptance based on the Technology Acceptance Model (TAM), including perceived usefulness, perceived ease of use, behavioral intention to use, and actual system use.	✓

 The National Professional Institution for Aviation
INSTITUTE OF COMPUTER STUDIES

	Criteria	4	3	2	1
7	The survey items and response choices are designed to produce consistent, reliable, and measurable responses relevant to evaluating the Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms for Shoelotskey Villamor-Pasay.	✓			
8	The terminology, language, and concepts used in the survey are appropriate, understandable, and relevant for Shoelotskey management, staff, and IT evaluators.	✓			
9	The layout and structure of the survey instrument are logically organized, visually clear, and technically sound.	✓			
10	The wording of the survey items is clear, precise, and understandable to the intended respondents.	✓			
11	The total number of survey items is appropriate and can be completed within the allotted time without causing respondent fatigue or disengagement.	✓			
12	The response scale provides an appropriate measure of the respondents' evaluation of the developed Web-Based Service Management System.	✓			
13	The survey instrument provides an accurate basis for evaluating the Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms in relation to the objectives of the study.	✓			
14	Overall, the survey instrument is suitable for evaluating the effectiveness, quality, and user acceptance of the Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms for Shoelotskey Villamor-Pasay.	✓

CERTIFICATION OF VALIDATOR

This is to certify that I have carefully reviewed and evaluated the survey questionnaire entitled **"A Web-Based Service Management System with Data Analytics Using Machine Learning Algorithms for Shoelotskey Villamor-Pasay."** of the following BSAIT students, Charmaine Rose G. Angeles, Kylan C. Gravino, Melody D. Sedanto.

After examining the contents of the questionnaire, I find that the instrument is appropriate, relevant, and aligned with the objectives of the study. The questionnaire is clear, organized, and suitable for collecting the data necessary to evaluate the proposed system.

Based on my review, I hereby approve the survey questionnaire for administration to the identified respondents, subject to the recommendations and revisions, if any, provided during the validation process.

This certification is issued upon the request of the researchers for academic purposes.

Issued this 30 day of July, 2026
